WORK EXPERIENCE

Syvora

Associate Systems Analyst

July 1 2025 - Present

Project: Fetch AI – Autonomous AI Agent Platform

- Built an AI agent platform for automating tasks like scheduling, task management, and bookings.
- Improved agent decision-making, task execution, and autonomous interactions.
- Worked on both frontend and backend development.

Project: Flaunch – Decentralized Token Launchpad Platform

- Developed features for a decentralized token launch and management platform.
- Integrated smart contracts for secure token launches and transactions.
- Connected APIs for custom token settings, automated liquidity, and revenue sharing.

EDUCATION

Acropolis Institute of Technology & Research, Indore

B. Tech - Computer Science - 8.20

October, 2022 - Present

Activities & Extracurriculars

- Participated in **Kriyeta – National Level Hackathon**, collaborating in a team to design and build a technology-driven solution under competitive timelines.
- Served as **Web Master, Acropolis Women Cell**, responsible for managing and maintaining web-related content and supporting digital initiatives.
- Actively participated in multiple **dance competitions**, including **Udbhav** and **Ardor**, demonstrating teamwork, creativity, and stage performance skills.

PROJECTS

SaveAndServe

- Built a full-stack platform to reduce food wastage by redistributing surplus food to NGOs and charities.
- Implemented AI-based demand forecasting to predict surplus inventory in advance.
- Developed real-time matching and notifications using Socket.IO.
- Created interactive dashboards for tracking donations and distribution status.
- Designed a scalable backend using Node.js, Express.js, and MongoDB with AWS deployment.

SKILLS

- **Programming Languages:** JavaScript, Java, C++, Python
- **Web Technologies:** HTML5, CSS3, JavaScript
- **Frontend Frameworks & Libraries:** React.js, Next.js
- **Backend Technologies:** Node.js, Express.js
- **Databases:** MongoDB, PostgreSQL, SQL
- **Version Control & Tools:** Git, GitHub, VS Code, Postman
- **Blockchain:** Blockchain Fundamentals, Smart Contract Integration

CERTIFICATE

System Design

Completed a system design certification focused on designing scalable, reliable, and high-performance applications. Gained practical knowledge of system architecture, API design, databases, scalability, and performance optimization.

MERN Stack

Completed hands-on training in full-stack web development using MongoDB, Express.js, React.js, and Node.js. Gained practical experience in building scalable, responsive web applications under an industry-aligned program by Microsoft and SAP.
